

# Weekly Test 1

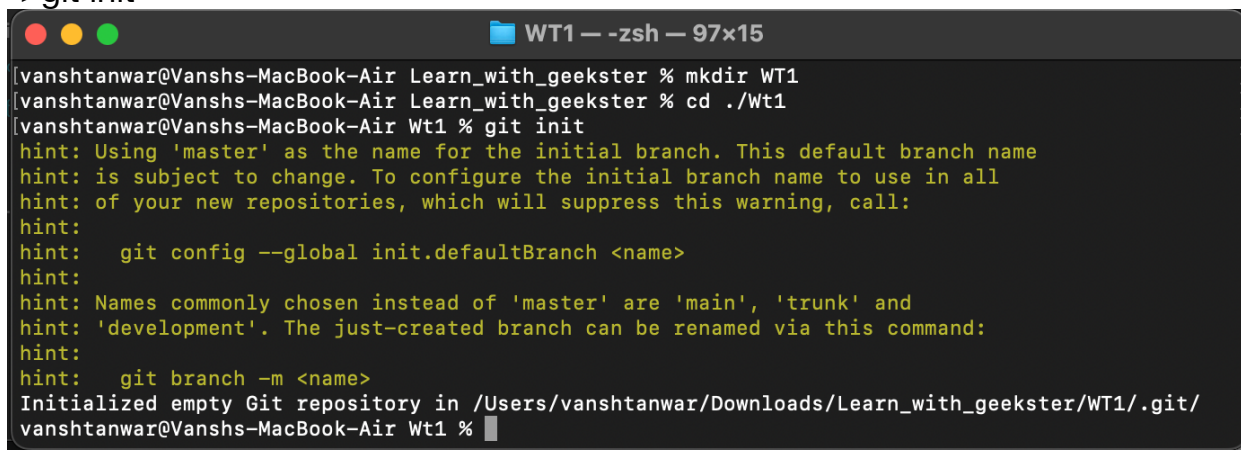

## 1. Initialize an empty repository in your local machine.

->mkdir WT1

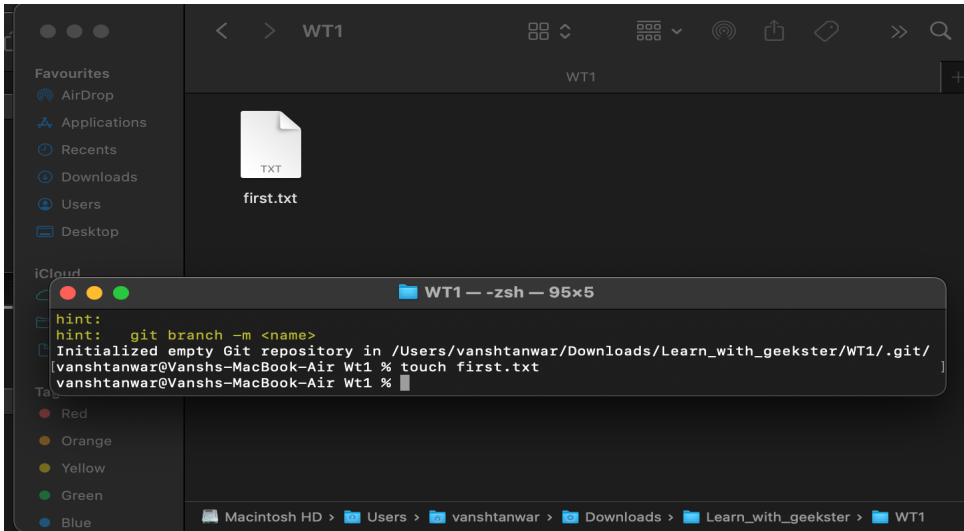

## 2. Initialize git inside that repository.

->git init

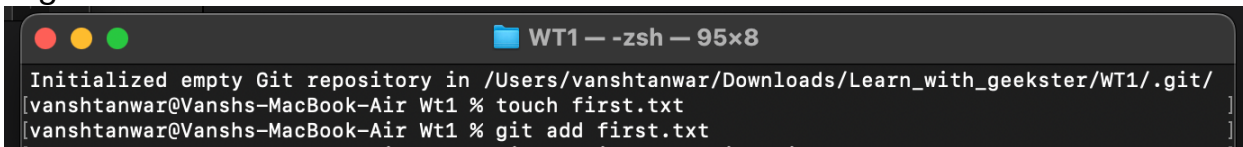

### 3. Create a file named first.txt.

->touch first.txt

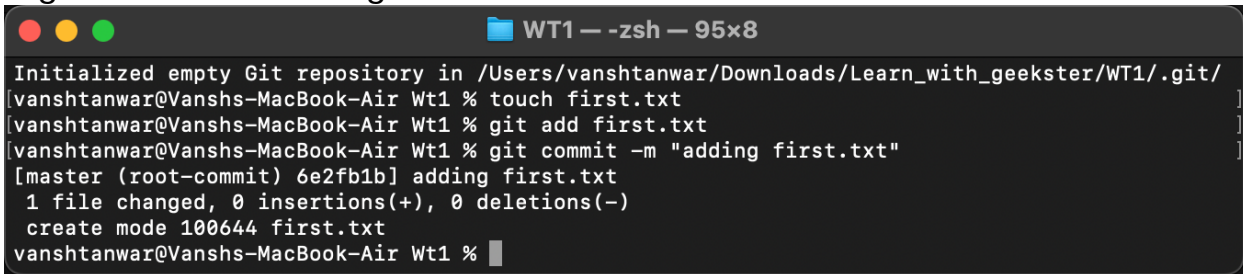

### 4. Add first.txt to the staging area.

->git add first.txt

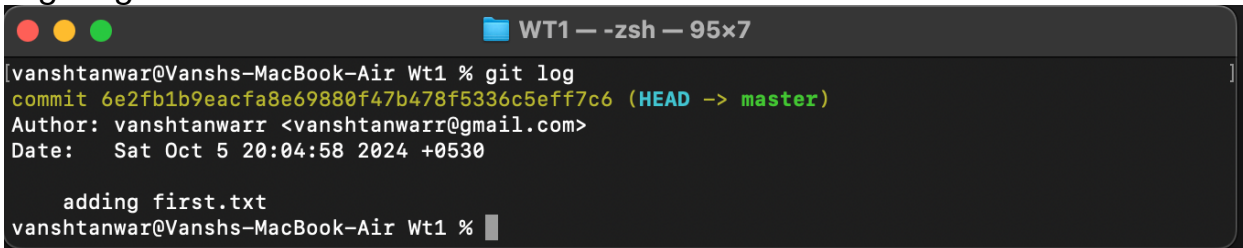

### 5. Commit with the message "adding first.txt".

->git commit -m "adding first.txt"

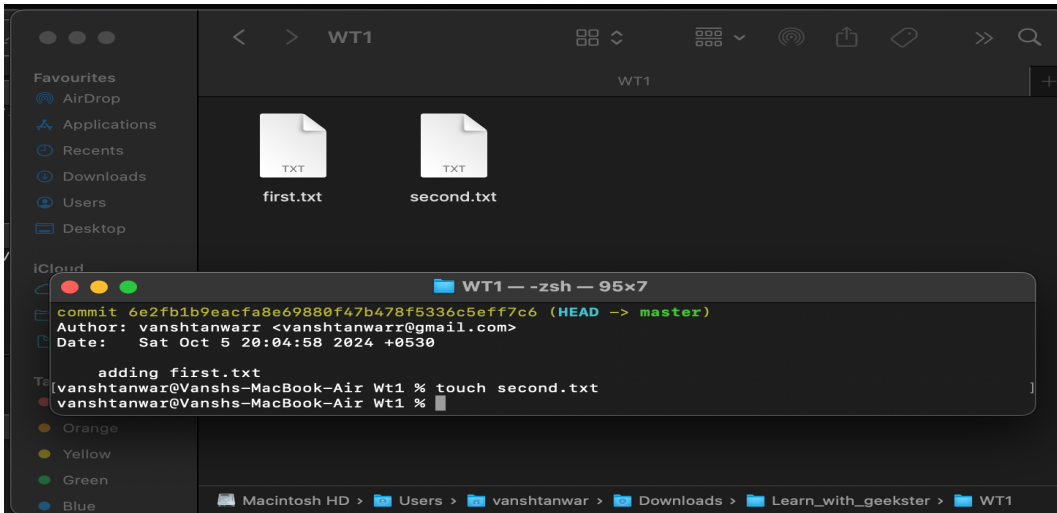

### 6. Check out your commit with git log.

->git log

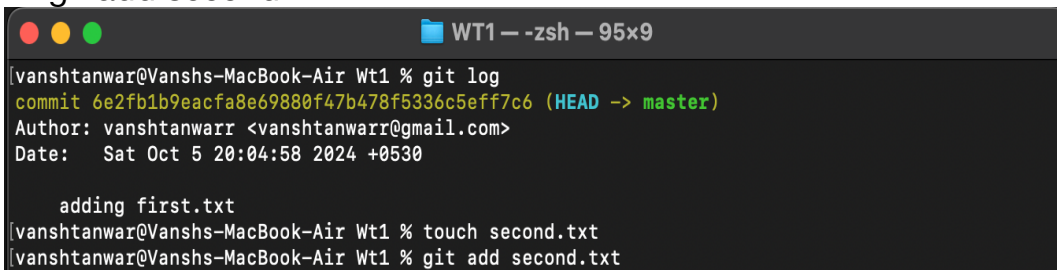

## 7. Create another file called second.txt.

->touch second.txt

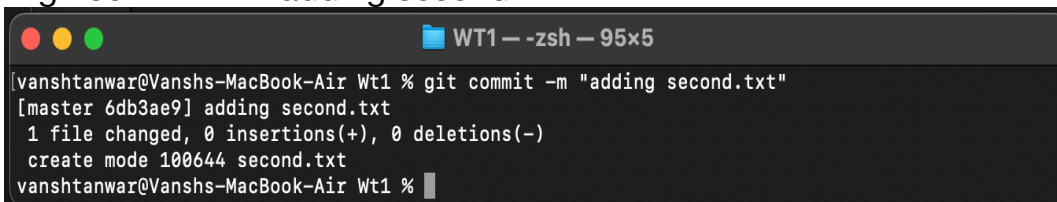

## 8. Add second.txt to the staging area.

-> git add second.txt

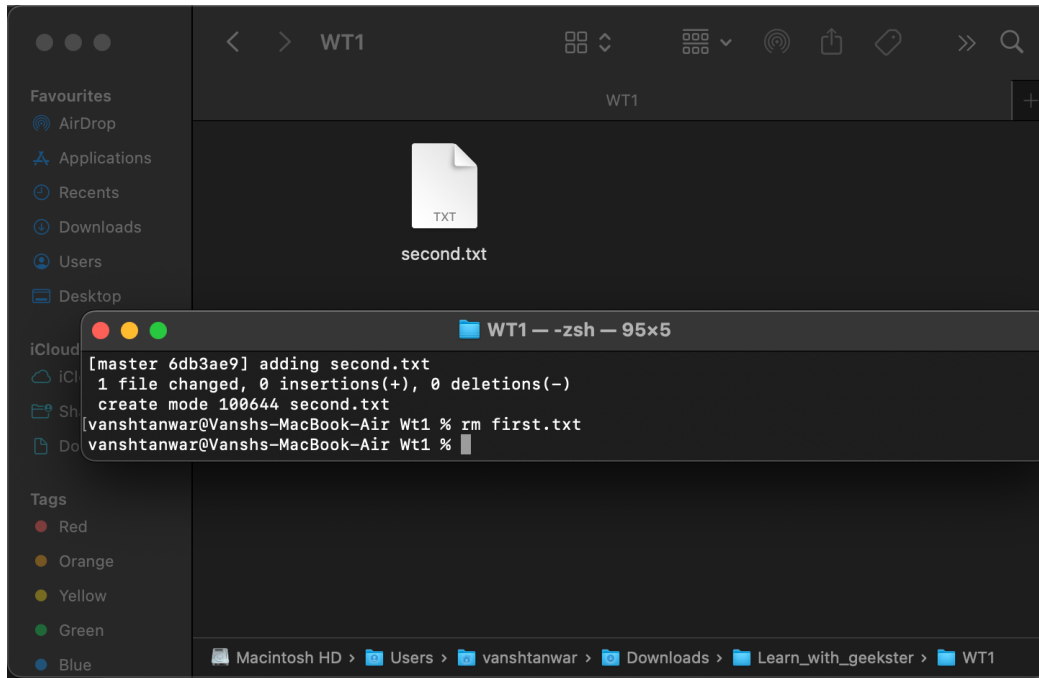

## 9. Commit with the message "adding second.txt"

->git commit -m "adding second.txt"

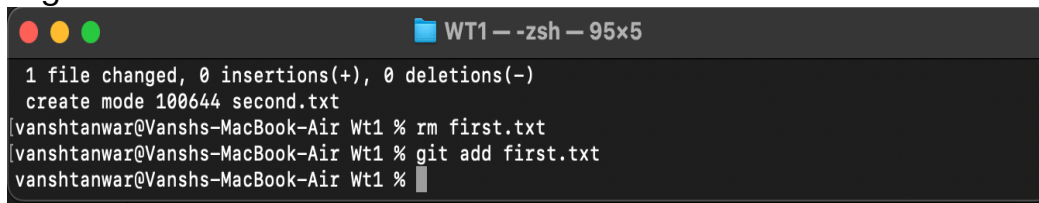

## 10. Remove the first.txt file.

-> rm first.txt

## 11. Add this change to the staging area.

->git add first.txt

## 12. Commit with the message "removing first.txt".

->git commit -m "removing first.txt"

## 13. Check out your commits using git log.

->git log

```

```

## 14. Create a GitHub repository with your own name.

## 15. Push your code to the same repository.

-> git add wt1.pdf

-> git push origin main

The screenshot displays a terminal window on the right and a GitHub repository page on the left. The terminal window shows the following sequence of commands and their outputs:

```
vanshtanwar@Vanshs-MacBook-Air vansh % git status
On branch main
Your branch is up to date with 'origin/main'.

Untracked files:
  (use "git add <file>..." to include in what will be committed)
        wt1.pdf

vanshtanwar@Vanshs-MacBook-Air vansh % git add wt1.pdf
vanshtanwar@Vanshs-MacBook-Air vansh % git status
On branch main
Your branch is up to date with 'origin/main'.

Changes to be committed:
  (use "git restore --staged <file>..." to unstage)
        new file:   wt1.pdf

vanshtanwar@Vanshs-MacBook-Air vansh % git commit -m "Added my code file to the repository"
[main 8382f92] Added my code file to the repository
 1 file changed, 0 insertions(+), 0 deletions(-)
 create mode 100644 wt1.pdf
vanshtanwar@Vanshs-MacBook-Air vansh % git status
On branch main
Your branch is ahead of 'origin/main' by 1 commit.
  (use "git push" to publish your local commits)

nothing to commit, working tree clean
vanshtanwar@Vanshs-MacBook-Air vansh % git push origin main

```

The GitHub repository page on the left shows the repository 'vanshtanwarr / vansh' with a public status. It displays the 'main' branch with 1 branch and 0 tags. The commit history shows two commits: 'Initial commit' and 'Added my code file to the repository'. The file list includes 'README.md' and 'wt1.pdf'. The README section is visible at the bottom of the page.
