# Day 2: Classwork

- Create a new directory.

—> mkdir CW2

- List all files and directories in the current working directory.
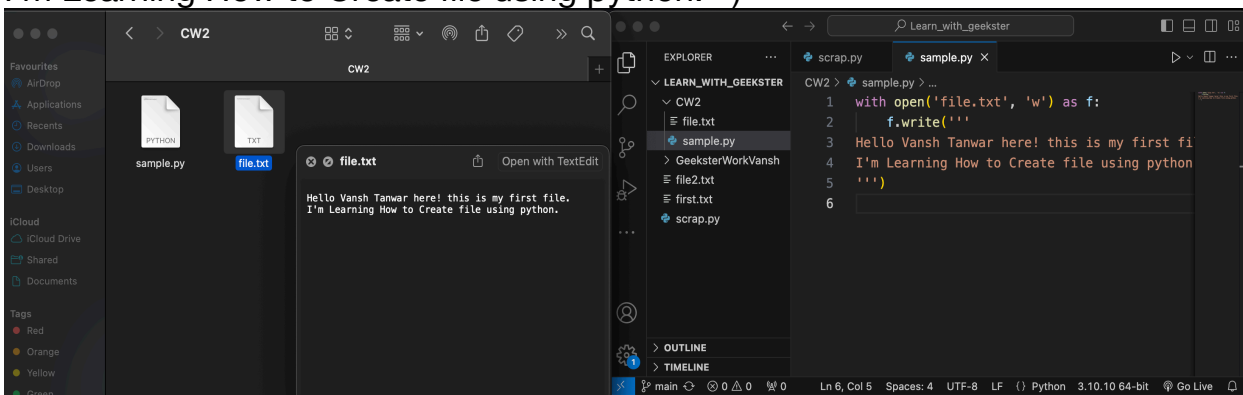

—>pwd
—> ls

- Create a new text file within the newly created directory and write some content to it.
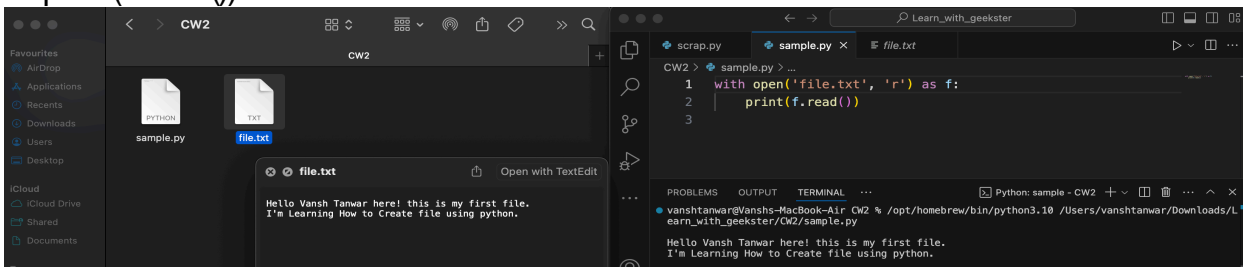

—>with open('file.txt', 'w') as f:
   f.write(''' Hello Vansh Tanwar here! this is my first file.
I'm Learning How to Create file using python.''')

- Read the content of the newly created text file.

—>with open('file.txt', 'r') as f:
print(f.read())

- Rename the text file.

—>mv file.txt content.txt

- List all files and directories in the new directory after renaming the file.

—>ls

- Delete the new directory and its contents.

—>rm -r cw2
